USING THE SOUND MIXER

HELP !

The sound mixer comes pre connected up with the following inputs, which are labelled:

PC	Plug the lead into the headphone socket of your laptop (Don't forget you may need to adjust the settings on your laptop) You can also use this to plug any other device into e.g. I phone
WI	Nothing to plug in, it's all ready to go
DVD	Nothing to plug in, it's all ready to go
MIC 1 / MIC2	Plug the XLR from the SM58 into

Now for the outputs which are labelled up :

EXT	These send the sound to your external speakers (All plugged in)
INT	These sent the signal to the white internal speakers (All plugged in)

GAIN A way of adjusting the level of the microphone before it is "mixed" using the controls below

EQ This enhances the sound

FX This sends a signal to the effects system (not used)

PAN Left Speaker or Right Speaker

LEVEL The master volume control for the input
