

# USING THE PROJECTOR

## SCREEN

Lower the screen at the rear of the MDU

## POWER

Turn on the projector, power button located behind the TV

Power on the projector using the remote, this is located in the plastic box in the storage area

## DISPLAY

The projector should find the source i.e. the device that you are using, if not use the remote to find the source.

All devices are set to go to the projector, you do not need to re-plug anything on the projector.

## POWER OFF

To power down please press OFF on the remote once, you will be asked to repeat this so click OFF again.

Wait for the projector to power down before turning off power.

## QUESTIONS ?

A full manual is included in the folder.
