

USING THE Wii

HELP !

The Wii is located in a plastic box in the storage area. It has many parts, please ensure that they are all kept in the box.

POWER ON

Plug the Wii power unit into a plug socket on the shelf

CONNECTORS

Connect up the Wii, the three plugs Yellow/Red/White being plugged directly into the socket on the wall.

Set the infra red bar in the middle of the floor
(We have plans to put this on the wall so it isn't in the way)

Calibrate the Wii as per instructions

VISION

The Wii will automatically generate its own source for the projector/TV, simply choose the source you want.

SOUND

Please use the Wii fader on the sound mixing unit.

QUESTIONS ?

Please see the manual in the folder
